

# Advanced Algorithms, Homework 0

[[**XXX TODO:** Lucas Jones]]

due: Friday, 1 September 2022

This homework assignment should be submitted as a single PDF file both to D2L and to Gradescope. For this homework, and this homework only, there is no penalty for submitting late.

General homework expectations:

- Homework should be typeset using LaTeX.
- Answers should be in complete sentences and proofread.
- You will not plagiarize, nor will you share your written solutions with classmates.
- Put your answers where the `todo` command currently is (and remove the `todo`, but not the word `Answer`).

**Getting to Know You** Answer the following questions:

1. What is your elevator pitch? Describe yourself in 1-2 sentences.

**I am a very self-sufficient person who is determined to my best always. [[XXX TODO: ]]**

2. What was your favorite CS class so far, and why?

**My favorite CS class so far is web development because I enjoyed learning about creating and utilizing databases. [[XXX TODO: ]]**

3. What was your least favorite CS class so far, and why?

**My least favorite CS class I have taken so far is probably Programming with C, because it felt very similar to other classes ive taken and didnt feel like a unique experience. [[XXX TODO: ]]**

4. Why are you interested in taking this course?

**I am interested in improving my overall knowledge of the topics associated with Data Structures and Algorithm's and Discrete Structures [[XXX TODO: ]]**

5. What is your biggest academic or research goal for this semester (can be related to this course or not)?

**My biggest academic goal this semesester is to challenge myself with an elective that interests me. [[XXX TODO: ]]**

6. What do you want to do after you graduate?

**I hope to work in the data science or web development industry. [[XXX TODO: ]]**

7. What was the most challenging aspect of your coursework last semester?

**The most challenging part of my coursework from last semester was my labs for my intro to logic circuits class [[XXX TODO: ]]**

8. Is your photo in Canvas a recognizable photo of yourself? (Note: the answer should be “Yes”).

**Yes [[XXX TODO: ]]**

**Self-Assessment** The prerequisites for this class are Discrete Structures (CSCI 246) and Data Structures and Algorithms (CSCI 232). Reflect on your in-class self-assessment “quiz” and briefly discuss here any weaknesses you can identify in your prerequisite knowledge. It is suggested to look at the course descriptions and/or course syllabi for these courses for a deeper reflection. If you do not identify any weaknesses, state so and reflect on what you plan to work on during this semester in order to strengthen your skills.

My knowledge of Discrete Structures and Data Structures and Algorithms has grown since taking them roughly a year ago. I was definently more confident with the topics in 232 than those covered in 246. My main weaknesses come from 246 topics. Overall I do feel fairly comfortable with most of the topics covered by this course, and I am excited to become more fluid with them [[XXX TODO: ]]
