

## Quiz 3

**Class Feedback.** Provide a short answer to each of the questions below. Your answers can be handwritten and scanned or typeset in your preferred way. Please upload to gradescope, and do not forget to select your pages.

1. Name an aspect of this class that you enjoy, and would like to see stay the same for the remainder of the semester.
2. What is one thing that you have done this semester (or are doing) that is working well for your learning in this course?
3. What specific advice do you give Dr. Fasy that would help improve your learning in this course?
4. What steps could you take to improve your own learning in this course?

1. An aspect of this class that I enjoy is the structure of the class. I enjoy working on the problems with our groups to try to figure them out, while you walk around helping groups out. This makes sense to me because every group is in a different place.

2. One thing I have done this semester that is working well for my learning in this course is working on the problems from our handouts that I don't get to in class time.

3. One piece of advice I would give is to implement the course with Canvas.

4. Steps I could take to improve my own learning in this course would be to spend more time working through the textbook problems, to ensure I have a good understanding of the topics covered.
